

I had visited Burjeel Hospital
in January 2016 and met Dr
Amit Kumar / Vascular Clinic. Thereafter
I had taken a CT scan and it was
very obvious that I had 80% blockage
in the left artery in the neck. After the
complete consultation with Dr. Kumar
I decided that Dr. Kumar to do the
vascular surgical operation. I made the
operation on 4th Feb 2016 and it was
very successful operation (100%) and
since then I did not feel any
negative result, and now I am
under complete recovery.
Thanks for Dr. Kumar and his team

For this excellent and very successful
operation and for the good support,
cooperation, and service I have
received from them.

Everything is fine
